

First Response Kit

Grab-and-go to the emergency.

The kit enables the 'first responder' to rush to the aid of someone who's injured.

The kit opens through 180 degrees, so the contents are immediately visible, enabling an individual to administer first aid treatment faster.

New Improved Contents

Grab-and-go kit for any emergency

- The contents are clearly laid out, and secured in individual compartments when the bag is opened up fully
- Stored in water resistant bag with double zip closure - keeps contents clean and dry when used outside
- Contents held in place with elastic loops
- Adjustable nylon shoulder strap
